ABSOLUTE BODY CONTROL was formed in 1980

Amassing an underground cult following, they drew inspiration from acts such as Suicide, D.A.F., and the UK electronic scene.

After releasing a 7-inch single, several tapes, and numerous compilation tracks worldwide, the band members went their separate ways.

Dirk Ivens and Eric Van Wonterghem went on to find success in other influential projects, including The Klinik, Dive, Blok 57, S/HE, Motor!k, Sonar, Monolith, Expo, and Insekt.

Following a 22-year hiatus, Absolute Body Control reformed and released *Lost & Found*, *Tapes 81-89*, and *Wind[Re]Wind*, which featured newly recorded versions of their finest tracks.

Building on this momentum, the band returned in 2010 with the albums *Shattered Illusion* and *Mindless Intrusion*.
This new material seamlessly blended modern production techniques with their lo-fi electronic roots—a definitive nod to their past.

Subsequent releases, including the compilation retrospective *Forbidden Games* (2016) and the 6-track EP *A New Dawn* (2021), beautifully showcase the early roots of electronic pop and industrial music. Through these works, the band members continue to influence and shape the electronic music landscape.

In early 2027, Absolute Body Control will release a brand-new vinyl and CD titled *Electric Airwaves*, celebrating the launch with a select run of rare live performances.
