SONAR, the collaborative project of

Dirk Ivens (Dive, The Klinik, Absolute Body Control, Motor!k)
and
Eric Van Wonterghem (Monolith, Insekt, Absolute Body Control),

SONAR
was formed with a clear mission: to create rhythmic noise and dark soundscapes.
By fusing analog and digital instrumentation, the duo crafts a signature sound where the rhythms evoke heavy machinery and the soundscapes mimic droning aircraft.

Sonar's music is designed to move you differently, locking the listener into a hypnotic beat.
It is a straightforward, uncompromising approach that builds on classic industrial traditions, heightened by powerful dynamics and finely tuned electronics.
Pushing the boundaries of electronic music,
Sonar continues to redefine
danceable industrial for the modern era.
